

CustomField

Özel alanlar, Vakalarınızı, Uyarılarınızı ve Gözlemlerinizi zenginleştirebilecek ek alanlardır.

Öncelikle, bir yönetici tarafından tipinin tanımlanarak özel bir alan oluşturulmalıdır. Birkaç tür mevcuttur:

- string
- integer
- float
- boolean
- date
- url

TheHive'da özel bir alan oluşturulduktan sonra, customFields alanına sahip nesnelerde kullanılabilir.

Ya bir json nesnesi geçirebilirsiniz:

```
{
  ...
  "customFields": {
    "business-unit": "Marketing",
    "reporters": ["Alice", "Bob"]
  }
}
```

veya bir değerler dizisi:

```
{
  ...
  "customFields": [
    {"name": "business-unit", "value": "Marketing"},
    {"name": "reporters", "value": "Alice"},
    {"name": "reporters", "value": "Bob"}
  ]
}
```

Bir özel alandaki çoklu değerler, dizideki değer tekrarlanarak (5.0'dan beri) veya nesnede bir dizi geçirilerek (5.1'den beri) desteklenir.
