GET /api/node/<name>

Belirli bir cuckoo node hakkında temel bilgileri alın:

```
$ curl http://localhost:9003/api/node/localhost
{
   "success": true,
   "nodes": [
      {
         "name": "localhost",
         "url": "http://localhost:8090/"
         "machines": [
            {
               "name": "cuckoo1",
               "platform": "windows",
               "tags": []
            }
         ]
      }
   ]
}
```
