

# GET /api/node/<name>

Belirli bir cuckoo node hakkında temel bilgileri alın:

```
$ curl http://localhost:9003/api/node/localhost
{
  "success": true,
  "nodes": [
    {
      "name": "localhost",
      "url": "http://localhost:8090/"
      "machines": [
        {
          "name": "cuckoo1",
          "platform": "windows",
          "tags": []
        }
      ]
    }
  ]
}
```
