POST /api/node/<name>/refresh

Cuckoo node tarafından ilişkilendirilen, özellikle de makineleri içeren metadata'yı yeniler:

```
$ curl -XPOST http://localhost:9003/api/node/localhost/refresh
{
   "success": true,
   "machines": [
      {
         "name": "cuckoo1",
         "platform": "windows",
         "tags": []
      },
      {
         "name": "cuckoo2",
         "platform": "windows",
         "tags": []
      }
   ]
}
```
