Warnings	<div>Content: Your event has neither attributes nor objects, whilst this can have legitimate reasons (such as purely creating an event with an event report or galaxy clusters), in most cases it's a sign that the event has yet to be fleshed out.</div> <div>Contextualisation: Your event has neither tags nor galaxy clusters attached - generally adding context to an event allows for quicker decision making and more accurate filtering, it is highly recommended that you label your events to the best of your ability.</div>
