

# Service Groups

**Service Groups** sekmesinden ise tüm ana sistem üzerinde çalışan host ve servisler hakkında genel bakışa sahip olabiliriz. İzlenen hizmetleri belirli gruplar halinde organize etmenizi ve yönetmenizi sağlar. Bu bölüm, benzer veya ilişkili hizmetleri bir araya getirerek, hizmetlerin durumunu ve performansını toplu olarak izlemeyi ve yönetmeyi kolaylaştırır.

The screenshot displays the Nagios web interface. On the left is a sidebar menu with categories: General, Current Status, Reports, and System. Under 'Current Status', 'Host Groups' is highlighted with a red box. The main content area shows 'Current Network Status' with a last update time of Mon Jun 24 14:56:52 +03 2024. Below this are two status summary tables: 'Host Status Totals' and 'Service Status Totals'. The 'Host Status Totals' table shows 1 Up, 0 Down, 0 Unreachable, and 0 Pending. The 'Service Status Totals' table shows 0 Ok, 0 Warning, 0 Unknown, 3 Critical, and 0 Pending. Below these tables is a 'Service Overview For All Host Groups' section, which shows a table for 'Linux Servers (linux-servers)' with columns for Host, Status, Services, and Actions. The table lists 'localhost' with a status of 'DOWN' and a critical service.

Up	Down	Unreachable	Pending
1	0	0	0

Ok	Warning	Unknown	Critical	Pending
0	0	0	3	0

Host	Status	Services	Actions
localhost	DOWN	CRITICAL	[Actions]
